Experience

Tech Lead, AI Engineer (freelance) Oct. 2025 – Present
Aneun Nomusa: LLM platform for HR and labor-law workflows *Seoul, Korea*

- Developed a labor-law expert agent that answers legal questions, drafts legal documents, and reviews compliance through a single entry point; optimized its **Planner / Executor / Composer** architecture down to **20–30 s** to first token on document-heavy requests
- Built retrieval over 10 public Korean legal databases with 127K document chunks, web search, and attorney-curated documents on legal-fine-tuned KURE embeddings; shipped document generation, review, and consulting on AWS. **1.1K users** through closed beta
- Built the internal evaluation harness for the product's 6 task types with over 1,000 practitioner-sourced queries, A/B ablations, and model-migration gates, all monitored through a self-maintained debug portal with per-request cost and token tracing

Interpreting Officer (First Lieutenant) Mar. 2020 – Jun. 2023
Republic of Korea Air Force, Logistics Command *Daegu, Korea*

- Lead interpreter for defense procurement with Boeing, BAE Systems, and Lockheed Martin, including quadrilateral ROKAF–USAF–DAPA talks at Boeing St. Louis; ROK–US Combined Exercises; Black Eagles airshow tour across 4 countries

Funded Projects

Sovereign AI Foundation Model | *NC AI* Sep. – Dec. 2025

- SFT cold-start data for **VAETKI-100B-A10B**: 60+ open datasets plus AIHub and in-house sources across 4 languages and 9 domains, curated to **6.5M Q/A samples** via 6-dimension clarity scoring and consistency-triggered human review

LegalMi:dm | *KT* Jul. 2024 – Jul. 2025

- Ran RegMix-style data-mixture experiments for legal continual pretraining; the team's Mi:dm-2.0 legal model (11.5B) was central to KT's successful bid in a **Supreme Court of Korea** consortium

Clinical RAG for Breast Cancer Decision Support | *Korea University* May – Dec. 2024

- Led end-to-end as principal researcher: 1,356 ASCO guideline documents, 98 clinician queries, FAISS + SentenceTransformers retrieval; showed small open-source models with RAG can approach GPT-4 on clinical decision support

Korean Writing & Grammar Assistant | *KOCCA & NIKL* Aug. 2026 – Present

- Designed the core evaluation metrics used to officially certify the agent across five tasks

First-Authored Publications

AgentHop: A Diagnostic Benchmark for Agentic Multi-Hop Scientific Question Answering. **C. Park**, J. Yoon, S. Han, H. Moon, H. Lim. *NeurIPS 2026 Evaluations & Datasets*

Can Small Open-Source Language Models With RAG Match GPT-4 Performance in Breast Cancer Clinical Decision Support? **C. Park**, I. H. Park, M. Kim, Y. Jang, H. Lim, Y. Hur. *JCO Clinical Cancer Informatics, 2026*

MIRAGE: A Metric-Intensive Benchmark for Retrieval-Augmented Generation Evaluation. **C. Park**, H. Moon, H. Lim. *Findings of NAACL 2025*

Funnel of Thoughts: Efficient Test-Time Scaling via Early Voting and Rollout Pruning. **C. Park**, S. Han, J. Yoon, S. Hong, H. Lim. *arXiv preprint, 2026*

Ko-MIRAGE: A Diagnostic Benchmark for Korean Retrieval-Augmented Generation. **C. Park**, Y. Hur, H. Lim. *HCLT 2025*

DOWA: Document-Augmented Word Assessment through Dual-Labeling Approach. **C. Park**, C. Park, A. I. Dainelles, H. Lim. *HCLT 2024*

Co-Authored Publications

Towards Privacy-Preserving Large Language Model: Text-free Inference Through Alignment and Adaptation. J. Yoon, **C. Park**, Y. Chun, H. Moon, H. Lim. *ACL 2026 Main*

Evidential Transformation Network: Turning Pretrained Models into Evidential Models for Post-hoc Uncertainty Estimation. Y. Chun, **C. Park**, J. Yoon, J. Seo, H. Lim. *CVPR 2026* (Highlight)

ZENA: Enhanced Anomaly-Based IDS for Smart Homes Automation through Multilayer Artificial Neural Network. N. K. Carlos, **C. Park**, I. Aiyanyo, H. Lee, H. Lim. *Journal of Communications and Networks, 2026*

LegalMi:dm: Use-Case-Driven Legal Domain Specialization for Korean Large Language Model. Y. Jang, **C. Park**, H. Moon, Y. Ham, J. Moon, J. Kim, J. Jung, H. Lim. *DATA-FM Workshop @ ICLR 2026*

SchemaPrism: A Diagnostic Benchmark for Profiling LLMs' Schema Linking Capability in Text-to-SQL. M. Kang, J. Son, **C. Park**, E. H. Prince, H. Lim. *AAAI 2027* (under review)

KITE: A Benchmark for Evaluating Korean Instruction-Following Abilities in Large Language Models. D. Kim, **C. Park**, H. Lim. *arXiv preprint, 2025*

Database Retrieval-Augmented Generation Framework Leveraging Large Reasoning Language Models and Schema Linking Methods. M. Kang, J. Son, **C. Park**, A. So, H. Lim. *HCLT 2025*

VAETKI Technical Report. NC-AI Consortium, data team contributor. *Technical report, 2026*

Patents

Device and Method for Evaluating Retrieval-Augmented Generation Systems (MIRAGE). Filed KR, Dec. 2025
Method and Apparatus for Accelerating Multi-Sample Inference of Large Reasoning Model (FoT). Filed KR, Aug. 2026

Education

Korea University — Seoul, Korea
M.S., Computer Science and Engineering — *Feb. 2025 – Feb. 2027 (expected)*

Goorm AI Natural Language Processing Course (12th) — Seoul, Korea
16-week intensive course work on linear algebra, statistics, machine learning, and Python — *Jun. – Oct. 2023*

Korea University — Seoul, Korea
B.A., Korean Language and Literature; second major, German Literature — *Mar. 2014 – Feb. 2020*

Technical Skills

Serving: vLLM, SGLang, Amazon SageMaker, sentence-transformers
Training: PyTorch, Transformers, DeepSpeed, TRL, Ray
Agent & RAG: FastAPI, SSE streaming, LangChain/LangGraph/LangTrace, multi-provider APIs (Gemini, Claude, OpenAI, Together, DeepSeek), FAISS, MongoDB
Data & Evaluation: datatrove, lm-evaluation-harness, evalchemy, FactScore, MTEB
Infrastructure: CUDA, Python, AWS (EC2, S3, Lambda, CloudWatch), Docker, Tailscale
Languages: Korean (native), English (professional, TOEIC 990, OPIc Advanced Low), German (professional, TestDaF 4/5/4/5)
